SKILLS

- HTML
- CSS
- JavaScript
- Python
- OOP (Java)
- UML
- Git Collaboration
- Photoshop
- Illustrator
- InDesign
- Figma
- After Effects
- Premiere Pro
- Procreate (Illustration)

DESIGN EXPERIENCE & PROJECTS

"Sonder Over Yonder" Board Game | Narrative & System Designer, Presentation Lead

Foundations of Game Design at SFU (March–April 2026)

- Designed a gameplay system and narrative structure fulfilling the objective of "transformative themes in play", using MDA framework to align underlying themes to decision-making mechanics
- Participated in writing story paths and endings for 16 unique characters, gaining inspiration from online research to craft realistic, appropriate, yet concise narrative experiences
- Collaborated in a team of 5 to prototype and conduct multiple rounds of playtesting to achieve balanced systems and steady gameplay flow
- Directed and wrote scripts for pitches, evaluations, trailers, and reports; used After Effects to combine digital media and audiovisual documentation into an animated demonstration of our game and its central themes

"Critters in Suits" Card Game | Concept & System Developer, Presentation Lead

Foundations of Game Design at SFU (January–February 2026)

- Pitched early compositions and visual identities to establish a cohesive theme for 12 unique cards types (4 per critter type), ensuring quick recognition during rapid gameplay
- Coordinated 5 iterative peer playtesting sessions, recording feedback to refine core mechanics into a highly accessible, fast-paced social gameplay experience
- Directed and animated a feature presentation video using After Effects, scripting and editing development footage to successfully showcase final game rules and design theory

"PantryPal" Mobile App | Programmer, Mobile UX Designer

Mobile Computing at SFU (January–April 2026)

- Partnered with a co-developer to conceptualize, design, and program a cohesive meal-planning platform tailored for home cooks, utilizing Git version control to manage feature commits
- Developed a cross-platform recipe-sharing app from scratch using React Native (JSX) and Expo, architecting complex navigation to seamlessly retain user state and data inputs across distinct app screens
- Engineered a dual-storage system using SQLite and AsyncStorage for offline features (grocery lists, pantry tracking) and Firebase for cloud-based user profiles and community recipe publishing
- Integrated native device APIs (camera and gallery permissions) to allow users to upload custom food photography, enhancing overall UI/UX customization and utility

"Pokéscope" Data Exploration Website | Front-End Developer, Web Designer

Introduction to Visual Analytics at SFU (March–April 2026)

- Partnered in a 3-person team to ethically source and analyze reliable dataset statistics spanning 9 game generations, translating the data into a gamified web experience featuring an interactive user quiz and explorable map
- Engineered interactive, narrative-driven data visualizations—including a clickable region map, timeline, and animated introduction—using D3.js, HTML, CSS, and JS to effectively tell the story of complex statistics
- Designed and developed the website's core navigation system, implementing a collapsible sidebar to ensure accessible, intuitive user flows across 4 distinct data pages.

EDUCATION

Simon Fraser University, Surrey, B.C.

2022–Present

BSc, School of Interactive Arts and Technology (SIAT)

OTHER WORK EXPERIENCE

Private Tutor (English/Math, K–12)

2022–Present

Worked with a students of various skill levels, ranging from elementary to high school, to strengthen knowledge and understanding of English Language Arts and Mathematical concepts.

Self-Managing

March 2026–Present

- Designed lesson plans according to student needs and current skill level, assessing consistent performance to ensure solid foundations and appropriate pacing
- Organized materials and learning logs for each individual student, tracking progression through curriculum materials and necessary workbooks; wrote up a classwork and homework note for parents after each lesson
- Managed the books; tracked scheduled payments and invoices, communicating regularly with parents for clarity on both ends

Supervised (by Teacher Julia Tang)

June 2022–March 2026

- Collaborated with managing teacher to finalize lesson plans and communicate academic plans and progress reports to parents
